### WHY YOU SHOULD ATTEND...

Because the MCE will give you a chance to explore the vast career opportunities the world of manufacturing has to offer you or your students as well as the corresponding educational career pathways.

Consider this: Manufacturers, remarkably adept at world-class production and highly synchronized supply chains, need an entirely new skill set to communicate with wired, multitasking, socially networked younger workers. Socially and culturally, **millennials, people born between 1981 and 2000**, are very different than their fifty-something counterparts and have a keen interest in sustainability and corporate social responsibility.

### DID YOU KNOW...

Career opportunities abound for all kinds of jobs in the advanced manufacturing industry with dozens of job titles from **robotics operator** to **manufacturing engineer**. There is something for everyone from hands on (**machine operator**) to high-tech (**semiconductor engineer**), to creative (**design engineer**), to scientist (**pharmaceutical researcher**).

Advanced manufacturing offers many kind of work environments. You can work at a **manufacturing plant** using your hands, in an **office** using computers to design parts, doing research in a **lab** or negotiating deals in a **conference room**. You can work for a **large firm** or a **small start-up** or even explore **entrepreneurial opportunities**.
